IHSAN

P A K I S T A N

www.ihsansafety.com

IHSAN started glove knitting in 1978 and set up a Gloves Knitting unit with the installation of 15 computerized Japanese Shima Seiki machines, which have since been increased to 290, consisting 7,10,13 & 15 gauge including terry. The unit initially produced plain knitted gloves for the Japanese, German, Australian and UK markets. With the addition of PVC coating equipment in 1996, IHSAN expanded its product range to meet the international

requirement for Dotted Criss-Cross gloves.

In 2007 IHSAN setup Latex / Nitrile dipping plant and this unit is currently producing high quality half and full coated gloves on seamless, interlock, safety cuff jersey as well as crinkle coated and on gauntlet liners all of which are CE Certified to meet the international quality requirements & standards

SPINNING & YARN PRODUCTION

IHSAN started its spinning unit in 1992 with the establishment of European market textile machinery like Trützschler, Schlafhorst and Rieter.

IHSAN Cotton is the trend setter in cotton industry for tapping in innovation and creating products that help us in our daily consumption of all sorts of Natural & Coloured yarns for gloves knitting.
